SOURCE

1. The station at Iana, where freight cars are loaded with uranium ore from the Buchovo mines, has been completely camouflaged, as protection against anticipated air raids.
2. Similarly camouflaged is the factory near the station, where the raw ore is given a first treatment. This treatment amounts only to mechanical cleaning, before it is sent on by rail to Varna, thence to the USSR.
3. At present about a thousand workers are working in the Buchovo mines, bringing out the ore. They are under Soviet foremen, who have Bulgarian foremen under them.
